

Installing

by Eric Suen

1. Requirements

- [Eclipse](#)
- [EMF](#)
- [GEF](#)
- [JFreeReport](#)

1.1. Eclipse 2.1 RC2 or later is required.

The latest GEF releases require Eclipse 2.1, RC2 or later is required.

1.2. The EMF (Eclipse Modeling Framework) plugin is required.

EMF Version 1.0.2 stable build (20030314_1622TL) or later is required.

1.3. The GEF (Graphical Editor Framework) plugin is required.

GEF Integration Build: I20030320 or later is required.

1.4. JFreeReport

eReport is just a report designer, it use JFreeReport as report engine. eReport contains JFreeReport cvs version library, it solved some known bugs since latest released version(0.8.1_02).

Note:

I only test it in Windows XP and JDK1.4.1_02, I's not sure whether it can run in Linux, JDK1.3 or not!

2. Installing eReport

Install EMF and GEF

Download the latest release, Unzip the downloaded package to a folder, Copy the selected folder to Eclipse **plugins** directory.

Warning:

To run the eReport Plugin, you will have to restart the Eclipse program.
